

TELX OFFERS A NEW ADDITION TO DIA SERVICES

MANAGED FIREWALL AND MANAGED UTM

Maximize your security investment

Firewalls and Unified Threat Management (UTM) devices play a crucial role in preventing harmful traffic from entering trusted network areas. However, managing, monitoring and consistently applying best practices to the range of security devices deployed can be a tedious and resource-intensive process.

Telx's Managed Firewall and Managed UTM services are monitored 24x7x365 by skilled security engineers to reduce the burden on in-house staff and lower your total cost of ownership. This service is powered by Tata Communications, an international leader in Security Services.

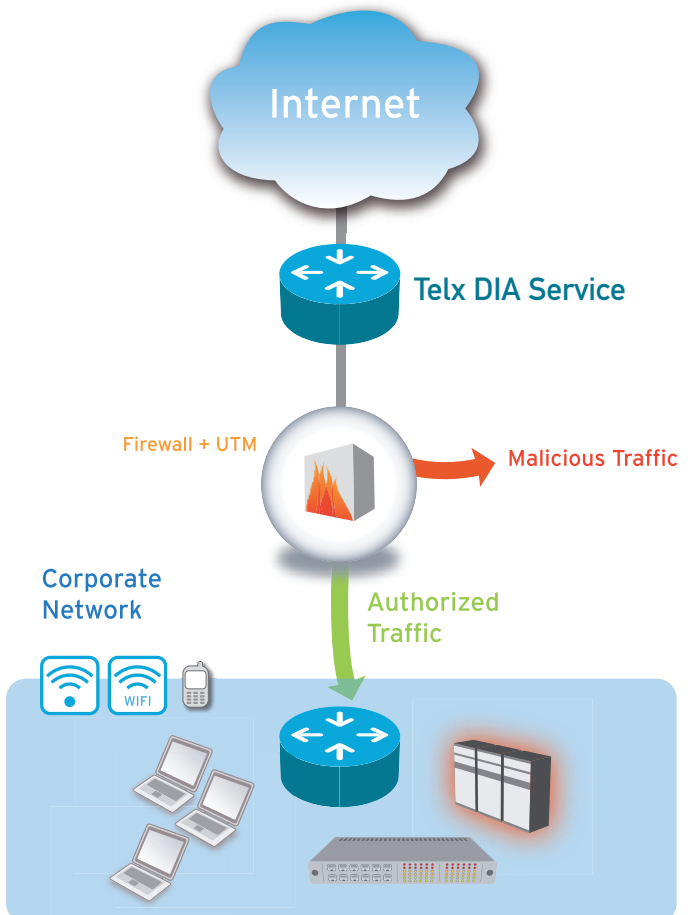

Key Benefits

- Minimize risk of business-impacting security breaches
- Meet industry certification and regulatory compliance guidelines
- Reduce security administration overhead, maximize existing IT infrastructure and resources, and achieve more efficient use of internal staff
- Increase coverage levels through 24x7x365 management and monitoring by experienced security engineers
- Use resources more efficiently with an all-in-one UTM solution
- Single vendor for DIA, security and colocation services in one secure colocation facility.

Key Features

- Customized planning, design and configuration of contracted firewall and UTM devices
- Support for site-to-site or remote access VPNs using IPSec
- All-in-one capabilities with UTM, including antispam, antivirus, intrusion prevention and content filtering.
- Three levels of service available.

Secure Telx Facility

MANAGED FIREWALL AND MANAGED UTM

Maximize your security investment

Comprehensive Intelligence

Our expert staff use advanced systems that provide accelerated log aggregation, advanced correlation and event prioritization to reduce the complexity and burden of manual data analysis and improve the accuracy of security event identification, incident escalation and remediation.

Industry-Leading SLAs

Tata Communications provides money-back guarantees on the performance and responsiveness of our Managed Firewall and Managed UTM service.
